All in one place

Difference → A lot of Difference
Ultra HD exports

1. No need to organise folders.

1. Media Page

→ organise / add media

* You CAN'T CHANGE LAYOUT

→ Smart bins - analyse only in STUDIO
VERSION.

→ 90% work

③ Edit Page

D - Disable clip.

Common as in premiere.

Ctrl-B → cut { you change to mine.

(Ctrl+Shift </>)

↳ swap left or right.

Basic 3D, CROP effect, Warp stabilizer

DYNAMIC ZOOM

↳ bhai humko manually karna
pata hai. PR mein.

2. Cut Page

↳ just to cut quickly

→ I found it VERY UNUSEFUL

→ source tape is quite interesting

→ (No)

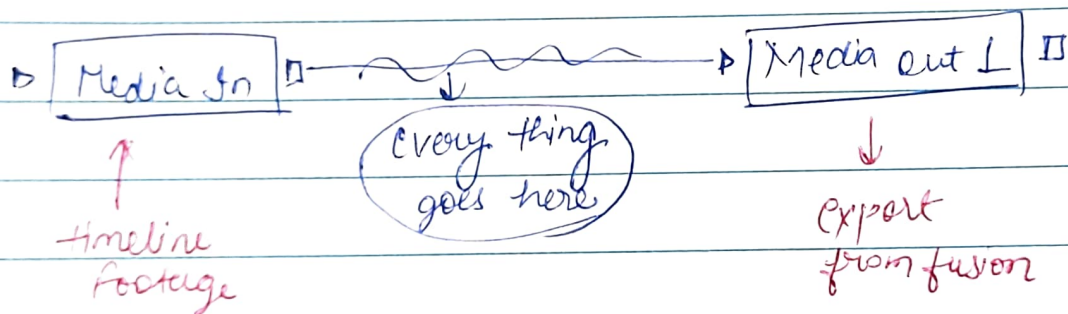

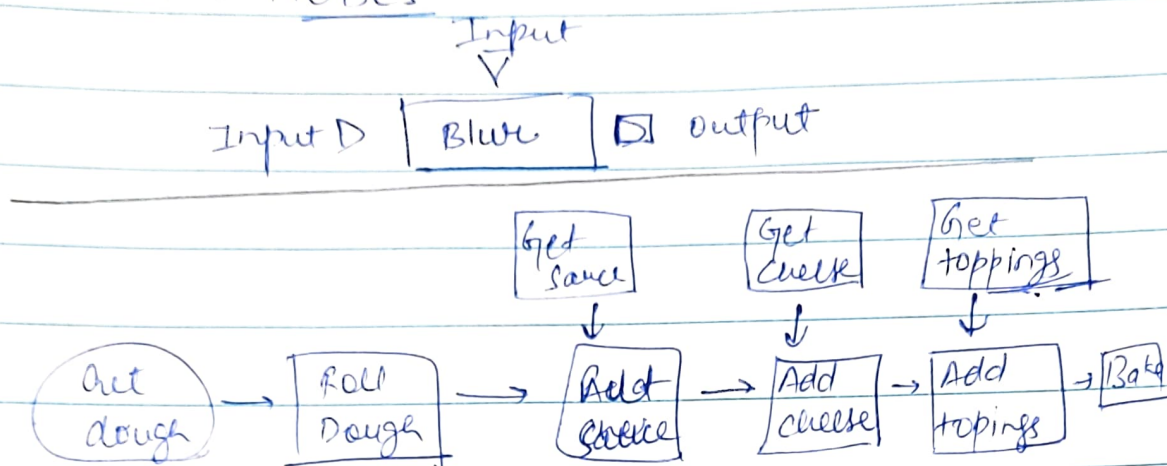

↳ it's actually good

↳ append media
with source tape
option

4. FUSION

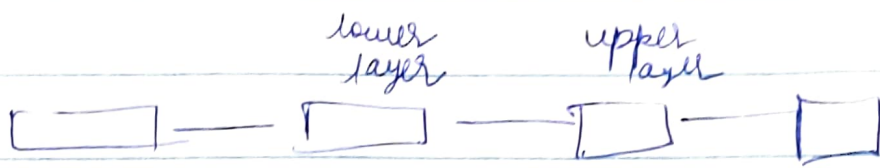

↳ compositor (like after effects)

1:37 → NODES

Shift + space → select tool

→ Merge node to stack something over existing footage.

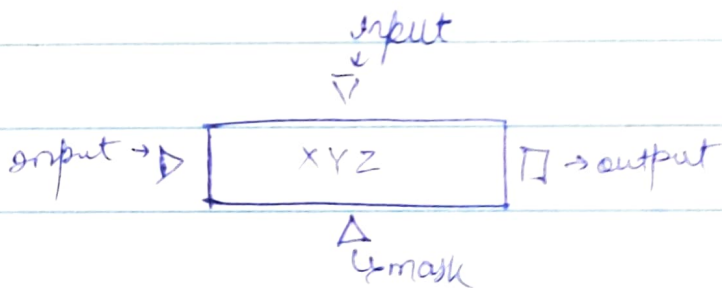

Merge Node → one input but clearer & simple

Multi Merge

↳ confusing ho jaata hai jyada nodes odd krne par

4 kinds of NODES

1. IMAGE NODES
2. EFFECT NODES
3. MERGERS
4. MASK NODES

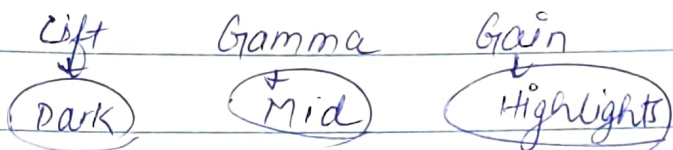

* Ctrl + t → to switch nodes
(bg is foreground)

* Fusion Comp. → empty fusion clip
as layers

5. COLOR PAGE

MOTION EFFECTS & 3D - STUDIO VERSION
ONLY

Mid detail

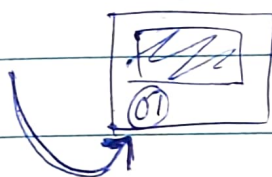

↳ mids ko sharp / unsharp krega
(PR SUCKS HERE)

* color mangement

↳ log to Rec.
↳ cant control completely

CST - color space transform

* click on no. to disable or enable node

1. clip node → only on that clip (color)
2. Post → after clip — (to all) ^{apply on}
3. Pre → before clip — (to all)

* Middle mouse button to copy

* COLOR GRADING THODA HARP HAI.
SPECIALLY GROUPING and CST.

* TOO ADVANCED AND DETAILED

* Can't be learned in 1 day
you need atleast 6-7 days
to ~~grasp~~ ^{understand} everything

→ Track mask in colour page

↳ CRAZY

↳ Pr why!!!

color wheel & log wheel

↓ → similar
↓

effect all

↓
only affect
~~can set~~
range

6. Fairlight Page

→ zoom to sample level (why Pr!!!)
