Professional Summary

B.Tech IT graduate skilled in Java Full Stack development, seeking a software development role to build scalable applications. Passionate about learning, collaborating in teams, and delivering innovative solutions.

Education

MGM's Jawaharlal Nehru Engineering College

Bachelor of Technology in Information Technology(B.Tech) (CGPA of 8.1)

August 2019 - July 2023

SambhajiNagar, India

Projects

Hospital Management System | Java, Spring-boot, PostgreSQL, Swagger

- * Developed a web-based hospital management system using Spring Boot and PostgreSQL to streamline patient data management and appointment scheduling.
- * Implemented user authentication and role-based access control for administrators, doctors, and receptionists.
- * Built separate sections to handle patient records, appointments, and bills, making hospital work faster and more organized.
- * Used APIs to securely save and retrieve data from the PostgreSQL database.

Employee Payroll System | Java, OOP, JDBC

- * Designed an employee payroll system using OOP principles, ensuring scalability, and maintainability of the codebase.
- * Implemented database connectivity with JDBC, enabling data retrieval, storage, and manipulation for payroll.
- * Leveraged object-oriented design patterns to manage employee records, calculate salaries, and automate tax deductions with accuracy and reliability.

Certifications

Qspiders Ed-Tech Pvt ltd

August 2024 - Present

Java FullStack Development

Pune, India

- Learned and honed OOPs concepts, Exception handling, Collections framework, and Multithreading.
- Hands on experience in **Oracle SQL**, writing complex queries, joins, and optimizing database performance.
- Hands on experience in implementing **JDBC** API and **Hibernate** ORM for seamless interaction between Java applications and databases for efficient data handling.
- Experience in designing responsive web pages using HTML and CSS to enhance user experience.

Sunbeam Info-tech Training Institute

September 2023 - May 2024

Trainee

Pune, India

- Learned core concepts of operating systems, memory management, and process scheduling.
- Gained knowledge of networking protocols and had hands-on experience in writing SQL queries.

Course

Java Programming Course From Udemy EdTech.

Computer Science Crash Course by Sunbeam Infotech Institute.

Extra Curricular and Interests

- * Participated in more than 20+ College Coding Hackthons.
- * Awarded Second Best Project in the IT Department for outstanding performance in the final year project.
- * Interest: Networking, speaking or sharing knowledge through mentorship.

Technical Skills

Languages: Java, Oracle-SQL, PL-SQL, Html, CSS, PostgreSQL

Frameworks/Libraries: JDBC, Collections, Hibernate, SpringBoot

Tools/Technologies: GitHub, VS Code, Eclipse, Postman, SQLPlus
